Exercise 12

Elisa Schöpf, Leon Krieger, Nikola Adzic

June 10, 2026

Contents

1 Setup and Basic Execution **1**

2 Profiling **1**

3 Code Understanding **1**

4 Optimization **1**

1 Setup and Basic Execution

LCC3 fib.lua results:

```
100 x fibonacci_naive(30)     time:  13.7866 s  --  832040
10000000 x fibonacci_tail(30) time:  15.8393 s  --  832040
25000000 x fibonacci_iter(30) time:  12.2847 s  --  832040
```

The median of averages from 20 runs was 13.7609 s

2 Profiling

3 Code Understanding

4 Optimization

Applying heuristics to OP_ADD resulted in 1.4% performance increase Using all optimizations above and -fprofile-generate + -fprofile-use resulted in 9.6% performance increase
